

Enrollment in the University of Nebraska’s qualified high deductible health plan (QHDHP) allows participation in a health savings account (HSA).

Note: the health savings account set-up will occur outside/after the annual NUFlex enrollment.

The screenshot shows the 'Plan Details' section of the NUFlex enrollment interface. It includes a dropdown menu for 'Plan Option' currently set to 'High Deductible'. Below it are fields for 'Coverage Category' (set to 'No Coverage'), 'Employee Monthly Cost' (set to 'Low'), and 'Employer Credit' (set to 'High'). A red box highlights the 'High Deductible' option in the dropdown menu. Below the plan details is the 'Dependents' section, which includes instructions on how to verify dependents and a legend for verification status: Verified (green checkmark), Verification Pending (orange checkmark), and Not Verified (red X).

When enrolling in the high deductible plan within NUFlex enrollment, a pop-up message will appear.

The success pop-up message box has a title 'Success' and contains the following text: 'Enrollment in the University of Nebraska’s qualified high deductible health plan (QHDHP) allows participation in a health savings account (HSA). The University offers a HSA through Fidelity Investments. Prior to the end of the year, Fidelity will communicate information regarding the opportunity to set-up and begin payroll-deductions to fund a Fidelity HSA account. Note: THE HSA SET-UP WILL OCCUR OUTSIDE/AFTER THE ANNUAL NUFLEX ENROLLMENT.' A 'Close' button is located in the bottom right corner.
